

To whom it is concerned,

ALEMINSA as Bitstream's representative in Ecuador has supplied to CNEL EP, (the main provider in the country responsible for the distribution of electric power), PTP time servers for substations which are to be installed all over the country.

For the period of mutual cooperation, BITSTREAM has delivered solutions based on precise time synchronization, in the number of over 120 devices.

Cooperation with BITSTREAM from the very beginning proceeded properly. Deliveries were carried out efficiently and reliably, and the highest quality standards of BITSTREAM devices fully met our expectations.

We recommend synchronization devices from BITSTREAM.

Please feel free to contact us for more details, if needed.

Sincerely,

Ing. Sofía Vinueza Ocaña
Gerente General
ALEMINSA S.A.
